RE: Updates to the Comox Valley Water Conservation Bylaw

Purpose

To modify the Comox Valley Regional District's (CVRD) water conservation bylaw to improve public implementation of the bylaw with revised watering dates and times.

Policy Analysis

Bylaw No. 129, being the "Comox Valley Water Conservation Bylaw No. 129, 2010", provides the authority to regulate water use within the Comox Valley Water System.

At the May 30, 2017 CVRD Board meeting the following motion was approved:

THAT Bylaw No. 479 being "Comox Valley Water Conservation Bylaw 2010, Amendment No. 4" be referred back to the Comox Valley Water Committee for further consideration.

At the June 13, 2017 Comox Valley Water Committee meeting the following motion was approved:

THAT consideration of updates to the water conservation bylaw be deferred until the next Comox Valley Water Committee meeting, in order that staff can provide information on the consequences of shifting watering times during water conservation stages 1 and 2.

Executive Summary

At the May 2017 Comox Valley Water Committee meeting, a staff report was brought forward recommending changes to the water conservation bylaw with the purpose of improving implementation of the bylaw for the general public, along with further reducing consumption by reducing sprinkling times in stage one of restrictions.

Following the May 30, 2017 CVRD Board meeting the proposed changes were referred back to the water committee for further consideration. At this time it is recommended to proceed with the majority of the changes, but remove the automatic shift to stage two due to the minimal time available to communicate the change to the public. This change will be brought forward with additional rationale early next spring. At the June 2017 Water Committee meeting, the revised bylaw was referred back to staff for further discussion on changing stage one watering times. The majority of changes will make the bylaw more user-friendly and are recommended based on significant public feedback and input. The proposed changes are summarized below:

- Implementation of an effective date of May 1 for stage one restrictions
- Changing stage one watering days from even and odd days to set days of the week to be consistent with the watering days in stage two
- Reducing sprinkling times in stage one watering restrictions
- Changing hand watering times in stage three to reflect the sprinkling times in stage two

A ‘redline’ draft of the revised bylaw is attached as Appendix A showing additions and deletions. While the changes to sprinkling restrictions are not significant, it is felt that these small changes will improve implementation of the bylaw by providing improved consistency to watering dates and times throughout the various stages. In addition, reducing sprinkling times in stage one is primarily focused on reducing consumption during peak times. Water consumption is the greatest in the morning and the evenings within the system, the selected time change for stage one watering restrictions is to offset sprinkling times with peak consumption times to improve operations of the system and minimize the instantaneous draw from the system.

The changes to watering dates have been consistently requested by the public. The revised bylaw will be accompanied with consistent public messaging regarding water conservation practices and strategies. Following adoption of the water conservation bylaw, a workshop will be held for irrigation industry professionals to communicate the new rules and regulations.

Recommendation from the Chief Administrative Officer:

THAT the board amend Bylaw No. 129 being the “Comox Valley Water Conservation Bylaw No. 129, 2010” to the revised bylaw attached as Appendix A;

AND FURTHER THAT an amendment to Bylaw No. 129 be considered for first, second and third readings at the July 25, 2017 board meeting.
